Abstract (en)
[origin: WO2017146576A1] Method for installing a light emitting unit on a wall part of a wind turbine tower having a through-hole therein comprising: providing a light emitting unit, wherein the light emitting unit comprises at least an optic element; - inserting the light emitting unit in the through-hole of the wind turbine wall from an outside of the wind turbine wall part to an inside of the wind turbine wall part such that the optic element remains at least partially at the outside of the wind turbine wall to provide, in use, a light emitting pattern.
