Abstract (en)

[origin: WO2017144348A1] The invention relates to a module unit (10) for adapting a mobile, portable communication device (20) to a security system (1) in a vehicle (2), in particular for the keyless activation of an access system for the vehicle (2), comprising an interface (10.1) for exchanging data (30) with the communication device (20), and at least one communication unit (10.2) for communicating with the security system (1), the module unit (10) being designed in such a way that the communication can be performed using a broadband communication process.
