Abstract (en)
[origin: WO2017147002A1] An interchangeable adapter for changing a light bulb that includes a head piece that has a base plate with opposite first and second sides and that defines a platform at the first side. A gripping member extends from the platform of the first side of the base plate away from the second side. The gripping member is positioned substantially centrally with respect to the platform to engage the light bulb. At least one release member links the base plate and the gripping member wherein movement of the base plate actuates the release member. An engagement member extends from the second side of the base plate away from the first side for engaging a holder of the adapter.
