Abstract (en)
[origin: WO2010074865A1] The instant invention provides a coating composition, a process of making a coating composition, a coated article, and a method of making such articles. The coating composition according to the present invention comprises: (a) a dispersion comprising; one or more base polymers; at least one first pigment partially encapsulated by said one or more base polymers, wherein said first pigment is a metal oxide selected from the group consisting of TiO₂, SiO₂, ZnO, Al₂O₃, combinations thereof; optionally one or more stabilizing agents; and a liquid media; and (b) optionally a binder composition.
