Abstract (en)

A pressure sensor unit (10) arrangable in a window unit (1) or in a door unit is provided. The pressure sensor unit is configured to be integrated in a cavity of a frame (3) or a sash (4) of the window unit (1) or door unit and configured to detect a state of the window unit (1) or door unit. The pressure sensor unit (10) includes at least one pressure sensor, arranged in or behind a frame sealing or a sash sealing, or arranged on the frame (3) opposite a sash sealing or on the sash (4) opposite a frame sealing of the window unit (1) or door unit. Further, the pressure sensor unit is configured to measure a pressure between the frame (3) and the sash (4) in at least one pressure point by measuring the pressure in said frame sealing or sash seal.
