Abstract (en)

[origin: WO2017148529A1] The invention is directed to a body (1) for a rail vehicle (100), comprising a control panel (4) for controlling the rail vehicle (100). The control panel (4) has a rest position and an operational position and is located in a control panel holder (41) in the rest position while being located at least in part outside the control panel holder (41) in the operational position such that control elements (42) are accessible for operation.
