Abstract (en)
[origin: WO2017155413A1] A foldable platform lift (1) arranged to operate in a working position wherein; first and second legs (B1, B2) are inclined downwardly and outwardly from a top hinge (K) with opposite angles about a vertical axis running through the hinge (K), a first wall bar (A, A1) is in contact with a wall in a first end, and the foldable scaffolding (2) in a second end, a working platform (G) is arranged between the foldable scaffolding (2) and the wall (W), and an actuator (5) is arranged for moving the working platform (G) vertically up and down along the wall (W), below the hinge (K). In a transport position the first and second legs (B1, B2) are folded towards each other about the pivot (P).
