Abstract (en)
[origin: WO2017148926A1] The invention is directed to a storage device (60) for an extractable hose (30) arranged in an installation space (11). The storage device (60) comprises a first housing member (62) defining a first storage compartment (63). The first storage compartment (63) being configured to house at least a portion of the hose (30) which is extractable from the first storage compartment via a hose port (64) arranged at the first housing member (62). The first housing member (62) has at least one spatial curved wall section (69) eluding the contour of at least one module (14) extending into the installation space (11).
