Abstract (en)
Provided is a toilet which is capable of suppressing the escape of odor from an upper part of a main body part. A toilet (1) is provided with a box-shaped main body part (10) into which urine is excreted, and a shielding member (22). The main body part (10) has a bottom surface part (12) and a side surface part (14). The shielding member (22) is provided projecting from the inner surface of the side surface part (14) toward the inside of the main body part (10), and blocks odor from the urine from rising.
