Abstract (en)
[origin: EP3424836A1] A multi-flow cap. The invention relates to a cap (1) formed by a cylindrical body. The lower part of the cap comprises a horizontal wall (2) including a diametrical slit (3) connecting to holes of different sizes (4a, 4b) located at the ends of the horizontal wall (2), and means for securing to the container. The upper part of the cap comprises a pouring zone formed by a circular section (5) with an outwardly projecting rim (6). The lid is suitable for use by the visually impaired.
