Abstract (en)

Package system (100), comprising a package (50) for tobacco or a tobacco related product with a storage compartment (51) configured for storing the tobacco or tobacco related product, and a least one closure element (52) configured for closing the storage compartment (51). A retaining element (60) on an inner surface (70) of one of the storage compartment (51) and the closure element (52) is configured for receiving a humidifier (10). The humidifier (10) comprises a carrier plate (11) with a first main surface (12) and a second main surface (13) opposite thereto, and a humidifying element (14) attached to the first main surface (12) of the carrier plate (11). The retaining element (60) mechanically interacts with a portion of the carrier plate (11) that is separate from the humidifying element (14). The present invention further relates to a package (50) and to a humidifier configured for the package system (100).
