Abstract (en)  
[origin: US2019013620A1] A hydraulic tool for uncoupling complementary connectors in their connected configuration, the efficiency of which is guaranteed because the positioning of its head about one of the connectors guarantees the hooking of the latter and the release of at least one piston for thrust against a panel to which the other connector is fastened.

Abstract (fr)  
La présente invention concerne un outil hydraulique de désaccouplement (1) de connecteurs complémentaires (8, 9) dans leur configuration connectée, dont l'efficacité est garantie car la mise en place de sa tête (3) autour d'un des connecteurs (8) garantit l'accrochage de ce dernier et la libération d'au moins un piston de poussée (44, 45) contre le panneau (P) auquel est fixé l'autre connecteur (9).
