Abstract (en)
[origin: WO2017152998A1] The invention relates to a footrest chassis (100) for fastening to a seat chassis (103), comprising a first region (101), a second region (102), at least one fastening means (104; 105) for fastening the first region (101) to the seat chassis (103) and a connecting means (106; 107; 108), wherein, the first region (101) and the second region (102), in the state in which the first region (101) and the second region (102) are attached to the seat chassis (103), are pivotable about a first pivot axis defined by the fastening means (104; 105), and wherein the second region (102) is connected to the first region (101) via the connecting means (106; 107; 108) and, during a pivoting movement of the first region (101) and of the second region (102) about the first pivot axis, an additional pivoting movement of the second region (102) takes place about a second pivot axis defined by the connecting means (106; 107; 108).
