Abstract (en)

[origin: WO2017153291A1] The present disclosure relates to a machine (1) and a method (100) for producing packaging inserts. The method comprising the steps of transporting (102) an insert material (6), holding (104) the insert material in a fixed position, moving (106) a first pressing device (2), and holding (108) and moving (110) the insert material toward the second pressing device (3) such that a partition wall (5) is formed. The machine 1 comprising a first pressing device and a second pressing device, wherein an insert material is transportable, the second pressing device is configured to hold the insert material, the first pressing device is configured to be moved along an axis A and to hold and move the insert material toward the second pressing device such that a partition wall is formed.
