Abstract (en)
[origin: WO2017153279A1] The present invention relates to a laundry washing or washing-drying machine (1) comprising a body (2); a top plate (3) that covers the upper surface of the body (2); a tub (4) that is disposed in the body (2) and wherein the washing process is realized; a spring (5) that enables the tub (4) to be hung in the body (2) and that absorbs the oscillation and vibration movements, and at least one damping means (6) that is disposed on the body (2) so as to be between the body (2) and the top plate (3) and that decreases the vibrations transmitted from the body (2) to the top plate (3) by supporting the top plate (3).
