Abstract (en)

[origin: GB2548101A] A downhole tool comprises a segmented housing, the segmented housing having at least a first 110 and a second tube segment forming part of the segmented housing and a first coupling 30 arranged between the first and the second tube segment for coupling the first tube segment with the second tube segment, the coupling at least partly forming part of the segmented housing. Recesses 41 may be provided in the first coupling for the installation of sensors 50 such as ultrasound sensors 52 or resistive sensors 54. Two sealing elements 43 may be provided in the coupling.
