Abstract (en)

[origin: WO2017153135A1] The invention relates to a method for operating a radar sensor, comprising the following steps: emitting an emission signal; capturing the emission signal which is reflected on the at least one target object by means of a capturing unit (100); evaluating the capturing signal; and controlling a cut-off frequency (f_{G1} ... f_{Gn}) of a high-pass filter (40) in accordance with the evaluated captured signal.
