Abstract (en)

[origin: WO2017153476A1] Optical detection system (1) for detecting a motor vehicle, comprising: a protective casing (3); an optical sensor (5) in the casing (3); on one side of the casing, a mesh (8) that is located along the optical axis (A) of the optical sensor (5), in the field of vision of the sensor (5), and extends perpendicularly to the optical axis (A); and on the other side of the casing, an air flow generator (19) that generates an air flow in the direction of the mesh (8).
