Abstract (en)

[origin: WO2017153683A1] The invention relates to an electric cable reel for recharging a motor vehicle, comprising a housing (72) and a cable (3), a first end of which is connected to a first electric connection plug that is secured to the housing and is located in a wall thereof, and a second end of which supports a second electric connection plug (34), the first plug protruding from said housing wall, at least in an operational position, in order to be connected to a power outlet.
