Abstract (en)

[origin: EP3428096A1] A center feed roll dispensing apparatus including: a roll support (110) that extends in a first direction from a first end to a second end; an end wall located in the first direction with respect to the first end of the roll support, the end wall (132) comprising a dispensing aperture; and a roll stop located in the first direction with respect to the first end of the roll support and spaced from the end wall. The dispenser comprises an open tray and could be used for dunnage material dispensing.
