Abstract (en)
[origin: RU2713065C2] FIELD: construction.SUBSTANCE: present invention relates to insulating façade installed before building outer wall. Insulating façade (100) mounted in front of outer wall (102) of building, has lag (108), vertical posts (110) between adjacent lags (108), insulating outer lining (104), made at distance from outer wall (102) of building, and insulation (112). Lags at least on sections adjoin outer wall (102) of building and are attached to it. Insulation (112) is made between skin (104) and outer wall (102) of building. Stands (110) are made at distance from outer wall (102) of building and are connected to outer wall (102) of building by at least one mounting angle (120). Also the design of fastening angle (120) is described.EFFECT: technical result is achievement of sufficient bearing capacity of posts.13 cl, 15 dwg
