Abstract (en)
[origin: EP3428539A1] A thermal cooking device according to the present disclosure includes: a heating compartment in which a cooking object is heated; a plane heater provided above a ceiling wall of the heating compartment, the plane heater being one heat source formed of an inner heater disposed right above a central portion of the ceiling wall, and an outer heater surrounding the inner heater; and a controller that controls the inner heater and the outer heater of the plane heater. The ceiling wall of the heating compartment has a three-dimensional curved surface concavely facing the heating compartment. The plane heater is fixed to make close contact with the ceiling wall throughout its entire area.
