Abstract (en)

[origin: CN109237553A] A cooking plate device comprises a cooking plate having a cooking plate body having a flat upper side and a flat lower side. A short pipe-shaped annular part is arranged on the lower side in a surrounding way. The annular part is arranged on the lower side near to the outer periphery of the heating plate body so as to protrude from the lower side. The outer side has a recessed latch notch. A fastening ring used for fastening the heating plate on the furnace frame plate of the furnace frame. The fastening ring comprises a continuously surrounding annular body. At least two protruding latches which mutually act with the recessed latch notch of the short pipe annular part and used as latch connection are arranged on the annular body in a protruding manner.
