Abstract (en)
[origin: WO2017157796A1] The invention relates to a self-closing device (5), in particular for drawer runners (1), comprising a housing (6), in which a guide (61) is provided for a linearly moveable slider (7) and a guide path (63) is provided for a catch (11) connected to the slider (7), wherein the catch (11) can be coupled to an activator (10) and a damper (8) having a damper housing (80) and a piston rod (81) is provided between the housing (6) and the slider (7), wherein a spring (9) is arranged around the damper (8), by means of which the slider (7) is pretensioned on the housing (6) in a closing position. The invention also relates to a drawer runner (1) having a self-closing device (5).
