Abstract (en)

[origin: WO2017158520A1] The invention relates to a machine (100) for the dispensing of infused beverages, said machine (100) comprising an emulsifying device (200) connected or connectable to an outlet conduit (130) of a steam delivery circuit, wherein said emulsifying device (200) comprises a nozzle (210) connectable to said outlet conduit (130), said nozzle (210) comprising a narrowing portion (211) and a branch portion (212) formed at said narrowing portion (211) through which a flow of fluid can be sucked by Venturi effect. The nozzle (210) comprises an insert (220) fitted in a cavity (210b) thereof between an outlet free end (210a) thereof and the narrowing portion (211), said insert (220) being configured so as to define with walls of said cavity (210b) a meandering path for the flow of fluid.
