Abstract (en)
[origin: WO2017158255A1] This folding-blade knife comprises a handle (2) defining a recess within which a blade (1), articulated close to one of the ends of the handle, can be stowed. Integrated into the handle (2) are: – a first means for locking the blade (1) in the folded position in order to prevent unintended egress of the blade from the handle (2); – close to the region where the blade is articulated to the handle, • a second means (6, 22) for unlocking said first locking means, said second means being actuable by the user, • a third means to cause the blade to rotate about its articulation axis once unlocked.
