Abstract (en)
[origin: WO2017158115A1] Tilt protection device (1) for releasably mounting on a transport pallet, such as a standardized transport pallet, such as a Euro pallet, having a setting-down side for setting down on the ground and, opposite the setting-down side, a bearing side on which the transport item is to be laid, and which is formed in particular by a plurality of horizontal bearing panels, such as bearing boards, arranged parallel to and at a distance from one another, said tilt protection device comprising a holding column (3) which, in a use state with the transport pallet, extends substantially vertically upwards over at least 30 cm from the bearing side, and a ground support (15) which is connected to the holding column, extends downwards to the ground along the transport pallet height in the use state and has a supporting end which faces the ground and is intended to be supported on the ground, and a prong portion (25) fixedly connected to the holding column and the ground support and intended for engaging below the transport item and in particular for engaging between the bearing panels.
