Abstract (en)
[origin: WO2017157422A1] A refrigerated sales furniture, comprises a furniture body having a refrigerated sales space (6) for storing goods to be presented therein and a machine unit space (8) positioned below the refrigerated sales space (6), and separated from the refrigerated sales space (6) by a refrigerated sales space bottom plate (10); the machine unit space (8) being enclosed laterally by side walls (12, 14), the undersides of which are for supporting the refrigerated sales furniture (2) against a floor; an intermediate support (16) extending downwardly from an intermediate position of the refrigerated sales space bottom plate (10) between the side walls (12, 14), for supporting the refrigerated sales space bottom plate (10) against a floor; wherein a machine unit support plate (18) is provided forming the underside of the machine unit space (8); the machine unit support plate (18) extending between a left outermost position adjacent the left side wall (12) and a right outermost position adjacent the right side wall (14); the machine unit support plate (18) being movable between a slid-in position and a drawn-out service position; the machine unit support plate (18) comprising an elongate opening (20) through which the intermediate support (16) extends, the length of the elongate opening (20) allowing a movement of the machine unit support plate (18) between the slid-in position and the drawn-out service position.
