Abstract (en)  
[origin: WO2017160403A1] A system and method for automatically generating reporting data based on an electronic document. The method includes analyzing the electronic document to determine at least one transaction parameter of a transaction, wherein the electronic document includes at least partially unstructured data; creating a template for the transaction, wherein the template is a structured dataset including the determined at least one transaction parameter; obtaining, based on the created template, a plurality of reporting requirements; and generating, based on the created template and the obtained plurality of reporting requirements, qualified reporting data.
