Abstract (en)

[origin: WO2017160372A1] A system and method for verifying a transaction based on an electronic document. The method includes analyzing the electronic document to determine at least one transaction parameter of the transaction, wherein the electronic document includes at least partially unstructured data; creating a template for the transaction, wherein the template is a structured dataset including the determined at least one transaction parameter; determining, based on the created template, at least one data source; obtaining, from the determined at least one data source, data evidencing the transaction; and determining, based on the obtained evidencing data and the created template, whether the transaction is verified.
