Abstract (en)
[origin: WO2017157957A1] The invention relates to a plug connector part which can be inserted into a bushing of a partition wall. A plug connector part according to the invention can be connected to a mating piece and can be inserted into a recess in a partition wall, wherein the plug connector part has a main body with a collar, wherein the collar projects beyond the surface of the recess in the partition wall, and is characterized in that a first sealing element in the form of a circumferential sealing lip is provided on that side of the collar which faces the partition wall, wherein the sealing lip is arranged such that, when the plug connector part is inserted into the recess in the partition wall, said sealing lip rests on the partition wall, wherein the plug connector part further has a second sealing element in the form of a cable insertion seal.
