Abstract (en)  
[origin: EP3431411A1] A carrier (105) for holding a plurality of containers (C) includes a plurality of panels extending at least partially around an interior space (110a, 110b) of the carrier, a front end flap (171a), and a back end flap (171b). The plurality of panels includes a front panel, a back panel, a front side panel, a back side panel, at least one bottom panel, and at least one central panel. A portion of the front panel forms a first curved corner (111) of the carrier and a portion of the back panel forms a second curved corner of the carrier. The front end flap is foldably connected to the front side panel (117a) and the back end flap is foldably connected to the back side panel, and at least one of the front end flap and the back end flap is flexibly reconfigurable and disposed at least partially in the interior space of the carrier.
