Abstract (en)

[origin: CN208605409U] The utility model relates to a fixing device and ventilation blower safety fence, fixing device is used for fixing with fixed supporting rod ventilation blower safety fence (50), ventilation blower safety fence has at least one first support arm (11) of extending in vertical direction, at least one first support arm constructs, stride across a plurality of rack stakes (3) of ventilation blower safety fence (50), at least one first support arm (11) have free vertical tip, and arrange in the region of vertical tip of the freedom of at least one first support arm (11) fixing device (13), fixing device (13) are including first fixed sheath (14) and at least one second fixed sheath (15), their combined action like this, make at least one grip zone (19) that hold first support arm (11) at least receive the support. According to the utility model discloses a fatigue strength characteristic for being directed at the ventilation blower fixing device that fixed supporting rod goes on fixing for the safety fence improves the fixed of safety fence and/or improves fixed component required for this reason.
