Abstract (en)

[origin: WO2017162557A1] The present invention relates to a method for controlling Septoria leaf blotch on cereal plants caused by Zymoseptoria tritici containing the V136A and/or I381V mutation, comprising treating cereal plants, their seed or the soil with a composition comprising (a) prothioconazole as compound I and (b) difenoconazole or tebuconazole as compound II. The present invention also relates to the use of a composition comprising (a) prothioconazole as compound I and (b) difenoconazole or tebuconazole as compound II for controlling Septoria leaf blotch on cereal plants caused by the pathogen Zymoseptoria tritici containing the V136A and/or I381V mutation by treating cereal plants, their seed or the soil with the composition.
