Abstract (en)
[origin: WO2017163099A1] The present invention provides a stacking means (1) for shipping or storing, in which products (2) are stored in stacked layers, each layer comprising a batch of products (2), said stacking means (1) comprising a plurality of trays (3) one above the other, the sizes of said trays (3) being compatible with the dimensions of a standard shipping pallet (4). It is characterized in that each tray (3) has a rectangular base (5) on which products (2) can stand, as well as side walls (6), extending from the perimeter of said base (5) and perpendicular to it, and at least one wall (6) works as a door (7) which can be opened for allowing side introduction of the products (2) in the tray (3), or closed. The invention also provides a corresponding tray.
