Abstract (en)

[origin: WO2017163195A1] A packaging (1) of at least a tile (2) and a method for packaging at least a tile (2). The tile (2) comprises an upper face (20) having a perimeter edge portion and a central portion (20a) which is internal of the perimeter edge portion. The packaging (1) comprises: a first flap (3) and a second flap (4) which cover a relative part of the perimeter edge portion of the upper face (20) of the tile (2); a first protecting element (5) for protecting the central portion (20a) of the upper face (20) of the at least a tile (2), which first protecting element (5) is strip-conformed, connects the first flap (3) and the second flap (4) to one another and is arranged so as to face the central portion (20a) of the upper face (20) of the tile (2), thus dividing the central portion (20a) of the upper face (20) of the tile (2) into a first region (21) and a second region (22); first fixing means which fix the first protecting element (5) to the first flap (3) and the second flap (4).
