Abstract (en)
[origin: WO2018157987A1] The present invention relates to a dispensing apparatus (10) for unpackaged goods, in particular baked goods such as bread, rolls or the like, having at least one carrier framework (12) and having at least one drawer-like insert (14), which in the installed state is inserted into the carrier framework (12), wherein the drawer-like insert (14) surrounds a goods-accommodating space (16), which contains at least one tray-like and/or board-like holder (18) for the goods, and wherein the drawer-like insert (14) has at least one front opening (22), via which the goods-accommodating space (16) and the tray-like and/or board-like holder (18) are accessible, and wherein the drawer-like insert (14) has at least one transparent door (24) and at least one door guide (28), which is arranged in the upper region of the opening (22), as seen in the installed and set-up state of the dispensing apparatus (10), wherein the door (24) has at least two guide pins (30) and wherein the door guide (28) also has a first guide aperture (32) and a second guide aperture (34), in which the guide pins (30) are guided such that the door (24) can be pushed at least to some extent into the goods-accommodating space (16), wherein the first guide aperture (32) runs substantially vertically, as seen in relation to the installed and set-up state of the dispensing apparatus (10), and wherein the second guide aperture (34) runs substantially horizontally and substantially rectilinearly, as seen in relation to the installed and set-up state of the dispensing apparatus (10), and wherein the door (24) is curved to such a pronounced extent in its upper region, as seen in relation to the installed and set-up state of the dispensing apparatus (10), that, when in the pushed-in state, the door (24) does not project beyond the upper edge (36) of the drawer-like insert (14).
