Abstract (en)

[origin: WO2017162969A1] The invention relates to an electric compressor (1) comprising a shaft (6) that is rotated by an electric motor via at least one bearing (7), the shaft rotatably driving a compressor wheel (3), the bearing (7) being located between the electric motor and the compressor wheel (3), the compressor comprising a thermal protection system (41, 42, 43) for at least one bearing (7).
