Abstract (en)

[origin: EP3434137A1] A modular element for the production of chains such as necklaces, bracelets, earrings and the like comprising a shaped body (2) having a head end (3) and a tail end (4) moulded for stable coupling to further respective modular elements (1) so as to make a chain, the shaped body (2) comprising: a pair of openings (6) connected to a channel (9) within the shaped body (2), the openings (6) being spaced with one or more partitions (12) and made at the tail end (4); a pair of jaws (15) connected to the head end (3) and shaped to fit at least partially into the inner channel (9), the jaws (15) emerging from the lateral surface (9) plan projection of the shaped body (2) so that they can be pushed towards each other from outside the shaped body (1).
