Abstract (en)
[origin: EP3434856A1] A device for attaching rolling shutters relating to a device whose purpose is to provide an attachment means between the first slat or upper slat of a slatted rolling shutter and the tubular rolling shaft of the same, which consists of a strap made up of several links and constitutes, at the same time, a means of security to prevent the rolling shutter from being lifted by pushing the slats from below and it only allows said lifting by rotating said shaft, due to the configuration of the gripping means of the same with the tubular shaft and the means of security that prevent said undue lifting of the rolling shutter.
