Abstract (en)

A marine well containment system capable of producing fluids from a marine oil and gas well comprising: a blowout preventer; a subsea containment assembly connected to the blowout preventer; a riser assembly, wherein the riser assembly further comprises a vertical pipe riser and a flexible riser and wherein the riser assembly is connected to the subsea containment assembly; a capture vessel connected to the riser assembly; wherein the capture vessel is capable of receiving fluids produced by the blowout preventer, captured by the subsea containment assembly, piped through the riser assembly to the capture vessel or a combination thereof.
