Abstract (en)
[origin: EP3435340A1] A perfume dispenser comprises loading stations (1, 1') for introducing perfumes into spray containers (2), receptacles (7) having a body (7.1) for containing perfumes, an outlet (7.2), and a sphere (7.3), with the sphere (7.3) being secured to the outlet (7.2) with the possibility of rotating in order to be impregnated with the perfume contained in the body (7.1) and spread the perfume all over itself, and holders (9) for holding the receptacles (7), the holders (9) being arranged in correspondence with an inner part of the dispenser in such a way that when the bodies (7.1) are held on the holders (9), the spheres (7.3) are accessible from an outer part of the dispenser. Therefore, when the spheres (7.3) are accessed and rotated by contact, the perfume contained in the body (7.1) is spread thereon and impregnates the spheres.
