Abstract (en)

[origin: WO2017171620A1] 1. A granule valve arrangement for a granule dishwashing apparatus, comprising a removable granule basket (117;117a) removably arranged on a granule valve (118;118a), said granule valve (118;118a) is arranged to be altered between a closed position, wherein a valve head (136;136a) covers an aperture (138;138) in the bottom (139;139a) of the granule basket (117;117a) for collecting granules in the granule basket (117;117a), and an open position, wherein the valve head (136;136a) is moved upwards so that granules can pass from the granule basket through the aperture in the bottom (139;139a) of the granule basket into the granule valve (118;118a).
