Abstract (en)

[origin: WO2017172151A1] A manufacturing method of mineral pitch resin, which comprises the steps of identification of the mineral, collection of the mineral, and processing of the mineral in a temperature controlled clean room facility by dissolving, filtering and demineralizing. This method produces a resin which is verifiably free from harmful contaminants and is safe for humans to consume as a healing, tonifying and adaptogenic substance.
