Abstract (en)
[origin: WO2017167447A1] The invention relates to a flexible bag comprising an inner compartment for receiving a hot and/or burning object, the bag being able to be rolled up and/or folded and having an opening for the insertion of the object into the inner compartment of said bag. According to the invention, a outer compartment that can be accessed from the exterior is provided on the third of the bag lying opposite the opening, a fire extinguisher being housed in said outer compartment in order to hold and dispense a fire-extinguishing agent.
