Abstract (en)

[origin: WO2017167422A1] The invention relates to a method for packaging piece good groupings (1), in which a plurality of piece goods (10), particularly containers (10), are at least partially interconnected by means of a first connection means, wherein at least two piece goods of this plurality are directly interconnected by means of the connection means (42). According to the invention, this plurality of piece goods (10) connected by the connection means (42) is packaged with a second connection means in the form of a second wrapping element (14), and said plurality of piece goods connected by a first connection means is conveyed by a conveyor device to a packaging unit (54) and enclosed, particularly wrapped, with the second wrapping element (14) by said packaging unit (54).
