Abstract (en)

[origin: WO2017167802A1] A container (10; 60) comprises a housing (12; 62) comprising a box (14; 64) and a lid (16; 66) hinged to the box. An inner package (18; 68, 70) of consumer goods is housed in the box and comprises: an upper opening (20) through which goods can be removed when the lid (16) is in the open position; and a cover flap (22; 72, 74) occluding the opening. The container further comprises a single reclosable adhesive label (24; 76) releasably affixed to the inner package (18; 68, 70). The reclosable label (24; 76) extends beyond the periphery of the opening and is affixed to the inner package (18; 68, 70) so as to at least partly overlie the cover flap (22; 72, 74) by means of a resealable adhesive provided on a first area of the inner surface of the reclosable label (24; 76) extending about at least a front edge of the opening. A front tab of the reclosable label (24; 76) is permanently affixed to the lid (16), such that upon opening the lid (16) the reclosable label (24; 76) is lifted off the inner package to reveal the cover flap (22; 72, 74).
