Abstract (en)

[origin: WO2017167830A1] The present invention relates to a transition structure 1 for bridging a structure joint between two structural parts of a structure 2, having at least one covering element 3 which at least partially covers the structure joint. Here, the covering element 3 is fastened to a structural part of the structure 2 via an anchor structure 4, wherein the anchor structure 4 is configured such that the at least one covering element 3 is mounted at selective points.
