Abstract (en)

[origin: WO2017171896A1] Embodiments of the present disclosure relate to support of a 60 gigahertz (GHz) band related to enhanced long term evolution (LTE) - wireless local area network (WLAN) Aggregation (eLWA). Some embodiments may relate to mechanisms by which a user equipment (UE) can signal support of the 60 GHz band. Other embodiments may relate to mechanisms by which an evolved NodeB (eNB) can signal information to the UE related to the 60 GHz band. Other embodiments may be described and/or claimed.
