Abstract (en)
[origin: EP3437499A1] The present invention provides a garment which can be quickly taken off while contaminants stuck on a hand of a wearer are inhibited from getting to the inside of the garment and a body during undressing. The garment of the present invention is a garment having an opening and closing portion for putting on and taking off the garment on a front body. In the garment, a tab is placed at any position on each of the left and the right outside the opening and closing portion, an upper end portion of the tab is attached to an upper end of the opening and closing portion in conformity to the opening and closing portion, and a distance from the upper end of the opening and closing portion to a position at which the zipper is attached to the opening and closing portion is at least 1 cm.
